Cautionary Note Regarding Forward-Looking Statements

To the extent any statements made in this presentation contain information that is not historical, these statements are forward-looking statements or forward-looking information, as applicable, within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and under Canadian securities law (collectively "forward-looking statements").

Forward-looking statements can generally be identified by the use of words such as "should," "intend," "may," "expect," "believe," "anticipate," "cottinue," "plan," "project," "will," "could," "would," "target," "potential" and other similar expressions. In addition, any statements that refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. Although Atlantic Power Corporation ("AT", "Atlantic Power" or the "Company") believes that the expectations reflected in such forwardlooking statements are reasonable, such statements involve risks and uncertainties and should not be read as guarantees of future performance or results, and will not necessarily be accurate indications of whether or not or the times at or by which such performance or results will be achieved. Please refer to the factors discussed under "Risk Factors" and "Forward-Looking Information" in the Company's periodic reports as filed with the Securities and Exchange Commission from time to time for a detailed discussion of the risks and uncertainties affecting the Company, including, without limitation, the outcome or impact of the Company's business strategy to increase the intrinsic value of the Company on a per-share basis through disciplined management of its balance sheet and cost structure and investment of its discretionary cash in a combination of organic and external growth projects, acquisitions, and on the Company's business of any such actions. Although the forward-looking statements, and the differences may be material. These forward-looking statements are made as of the date of this news release and, except as expressly required by applicable law, the Company assumes no obligation to update or revise them to reflect new events or circumstances. The Company's ability to achieve its longer-term goals, including those described in this news release, is based on significant assumptions relating to and including, among other things, the general conditions. The Compan

Disclaimer – Non-GAAP Measures

Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP, and is therefore unlikely to be comparable to similar measures presented by other companies. Investors are cautioned that the Company may calculate this non-GAAP measure in a manner that is different from other companies. The most directly comparable GAAP measure is Project income (loss). Project Adjusted EBITDA is defined as project income (loss) plus interest, taxes, depreciation and amortization (including non-cash impairment charges), and changes in the fair value of derivative instruments. Management uses Project Adjusted EBITDA at the project level to provide comparative information about project performance and believes such information is helpful to investors. A reconciliation of Project Adjusted EBITDA to Project income (loss) and to Net income (loss) by segment and on a consolidated basis is provided on slides 32 and 33.

Cash Distributions from Projects is the amount of cash distributed by the projects to the Company out of available project cash flow after all project-level operating costs, interest payments, principal repayment, capital expenditures and working capital requirements. It is not a non-GAAP measure. Project Adjusted EBITDA, a non-GAAP measure, is the most comparable measure, but it is before debt service, capital expenditures and working capital requirements. The Company has provided a bridge of Project Adjusted EBITDA to Cash Distributions from Projects on slides 31.

All amounts in this presentation are in US\$ and approximate unless otherwise stated.

- 2018 Guidance
- Q&A

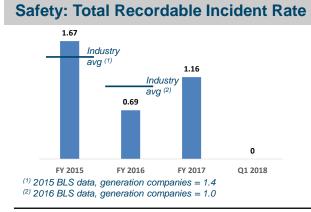

Q1 2018 Highlights

Financial Results	• First quarter results keep us on track to achieve our full year 2018 expectations
	Repaid \$32.4 million of debt during first quarter
	- On track to repay \$100 million for full year 2018
Balance	 Convertible debenture issuance and subsequent redemptions addressed all but \$19 million (US\$ equivalent) of 2019 maturities
Sheet	Leverage ratio 3.2 times at March 31, 2018
	- Will increase by year-end, then expect decline in 2019 and beyond
	Liquidity of \$205.1 million at March 31, 2018, including ~ \$32 million of discretionary cash
	- Re-priced credit facilities for third time
	 Repurchased \$7.4 million of common and \$4 million (US\$ equivalent) of preferred shares in March and April 2018 under our normal course issuer bid
Capital	- Average price \$2.10 per common share
Allocation	 Returns of 10-11% on repurchases of preferred shares
	 Expected returns on internal investments and equity repurchases superior to what we see externally
	Merck exercised first one-year renewal option at Kenilworth (to Sept. 30, 2019)
PPAs	 Unable to reach agreement on commercial terms with Navy for site control at three San Diego projects
	 Average remaining contract term 6.75 years; two-thirds of estimated Project Adjusted EBITDA in 2018 is from PPAs that expire after 2022

Q1 2018 Operational Performance:

Lower generation primarily due to San Diego PPA expirations, but availability improved

AtlanticPower

Availability (weighted average)					
Q1 2018 Q1 2017					
East U.S.	98.0%	96.8%			
West U.S.	97.2%	98.6%			
Canada	99.7%	91.4%			
Total 98.3% 96.4%					

Higher availability factor:

- + Mamquam outage in prior period
- + Piedmont outage in prior period
- Oxnard forced outage

Aggregate Power Generation Q1 2018 vs. Q1 2017 (Net GWh)

Generation is down:

- Naval Station / North Island / NTC ceased operations in February 2018
- Frederickson lower demand due to mild ambient temperatures
- + Manchief higher dispatch
- + Morris and Chambers higher dispatch due to colder ambient temperatures
- + Orlando and Piedmont maintenance outages performed in prior year
- + Mamquam higher river flows

Operations Update

Tunis Planned Restart

- Targeting commercial operation in July 2018
 - Simple-cycle operation under 15-year PPA
- Restart maintenance is on track
 - Gas turbine overhaul is complete
 - Generator overhaul is complete
 - Control system upgrade underway
 - Estimated cost of \$5 \$6 million; majority to be incurred and expensed in 2018

Nipigon Long-term Enhanced Dispatch Contract

- · Plant is currently mothballed
- Expected return to service Nov. 1, 2018 under long-term EDC (through Dec. 2022)
 - To return in simple-cycle model and operate on a flexible basis (when needed/economic)
 - LTEDC provides for monthly capacity-type payments
 - Will earn energy revenue when operates, but capacity factor expected to be low
 - Improved economics vs. original PPA

Significant 2018 Outages

- Manchief GT11 overhaul began mid-April; expected completion late-May
- Kenilworth Gas turbine modified overhaul underway; expected completion mid-June; continuing to operate on lease engine
- Mamquam replacing runners at both units; expected to take a total of six weeks (mid-August through September)

Analysis & Benchmarking for Cost Savings

- Internal benchmarking of plants completed
- Close to selection of outside consultant for external benchmarking
- Deployed Predictive Analytic software (PRiSM) at three sites in 2017
- Plan to deploy at two to three additional sites in 2018 to improve reliability and to enhance condition-based maintenance

Commercial Update: PPA Renewal Status

Naval Station, NTC and North Island (San Diego)

- Land use agreements with U.S. Navy expired; plant operations ceased Feb. 7, 2018
 - Proposal to Navy has not resulted in agreement that would provide us site control
 - Unlikely to obtain site control at any of the three sites
 - Proceeding with plans to decommission the sites; in process of defining scope and timing of work with the Navy
- PPAs with San Diego Gas & Electric (SDG&E) for all three plants were terminated effective March 1, 2018
 - California Public Utilities Commission (CPUC) approved early termination of the PPAs
 - 30-day appeal period has expired
 - No early termination penalties were incurred
- Have signed new seven-year contracts with SDG&E (Naval Station, North Island) and Southern California Edison (NTC)
 - However, further operations are dependent on site control
 - Naval Station and North Island contracts have been approved by CPUC
 - NTC contract is pending CPUC approval

Commercial Update: PPA Renewal Status (continued)

Williams Lake (British Columbia)

- Reached agreement for short-term contract extension in December 2017
- Short-term extension runs from April 2, 2018 to June 30, 2019 (or Sept. 30, 2019 at BC Hydro's option)
- In early April, BC Utilities Commission ordered a written hearing on contract extension
 - Proceeding commenced in late April
 - Timeframe for a ruling not determined
 - Either party has right to terminate if contract does not receive regulatory approval
- Currently expect de minimis Project Adjusted EBITDA contribution during short-term extension
- Written hearing regarding appeal of amended air permit (to burn alternative fuels) currently underway
 - Decision expected Q4 2018

Kenilworth (New Jersey)

- In late April, Merck exercised its first one-year renewal option of the Energy Services Agreement (ESA)
- ESA now expires Sept. 30, 2019
- Substantially similar to original ESA terms
- Continuing to discuss with Merck what role we might play in meeting its short- and long-term energy requirements

Q1 2018 Financial Highlights and Recent Developments

	Project Adjusted EBITDA Q1 2018 \$53.4 million vs Q1 2017 \$63.8 million

2018 Project Adjusted EBITDA Guidance (Bridge vs 2017)

(\$ millions)

No change from Q4/YE 2017 presentation

The Company has not provided guidance for Project income or Net income because of the difficulty of making accurate forecasts and projections without unreasonable efforts with respect to certain highly variable components of these comparable GAAP metrics, including changes in the fair value of derivative instruments and foreign exchange gains or losses. These factors, which generally do not affect cash flow, are not included in Project Adjusted EBITDA.

APLP Holdings Term Loan Cash Sweep Calculation

APLP Holdings Adjusted EBITDA

(note: excludes Piedmont; is after majority of Atlantic Power G&A expense)

Less: Capital expenditures Cash taxes

= Cash flow available for debt service

Less: APLP Holdings consolidated cash interest (revolver, term loan, MTNs, EPP, Cadillac)

= Cash flow available for cash sweep

Calculate 50% of cash flow available for sweep

Compare 50% cash flow sweep to amount required to achieve targeted debt balance

Must repay greater of 50% or the amount required to achieve targeted debt balance for that quarter

If targeted debt balance is > 50% of cash flow sweep:

- Repay amount required to achieve target, up to 100% of cash flow available from sweep
- Remaining amount, if any, to Company

If targeted debt balance is < 50% of cash flow sweep:

- Repay 50% minimum
- Remaining 50% to Company

Expect cash sweep to average 65% to 70% over the life of the loan, though higher in early years, and with considerable variability from year to year

Expect > 80% of principal to be repaid by maturity through mandatory and targeted repayments

Notes:

The cash sweep calculation occurs at each quarter-end. Targeted debt balances are specified in the credit agreement for each quarter through maturity.

Leverage ratio:

Consolidated debt to Adjusted EBITDA, calculated for the trailing four quarters.

Consolidated debt includes both long-term debt and the current portion of long-term debt at APLP Holdings, specifically the amount outstanding under the term loan and the amount borrowed under the revolver, if any, the Medium Term Notes, and consolidated project debt (Epsilon Power Partners and Cadillac).

Adjusted EBITDA is calculated as the Consolidated Net Income of APLP Holdings plus the sum of consolidated interest expense, tax expense, depreciation and amortization expense, and other non-cash charges, minus non-cash gains. The Consolidated Net Income includes an allocation of the majority of Atlantic Power G&A expense. It also excludes earnings attributable to equity-owned projects but includes cash distributions received from those projects.

Interest Coverage ratio:

Adjusted EBITDA to consolidated cash interest payments, calculated for the trailing four quarters.

Adjusted EBITDA is defined above.

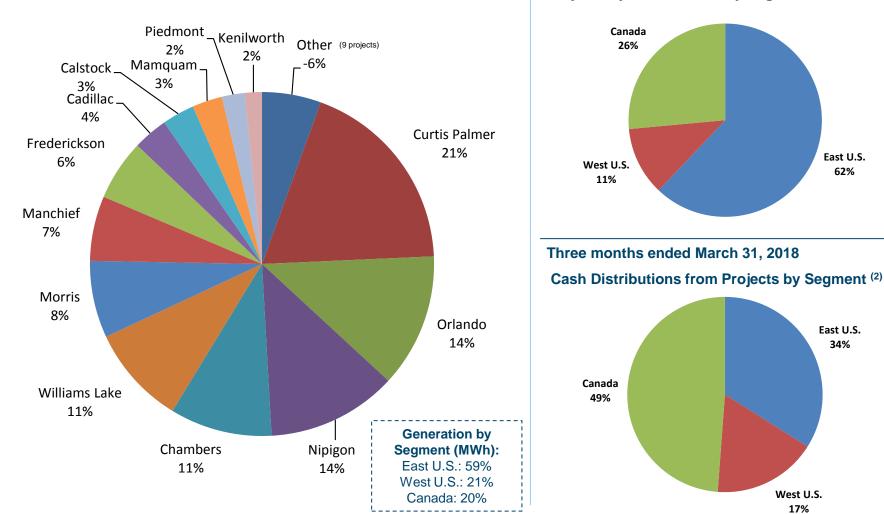

Consolidated cash interest payments include interest payments on the debt included in the Consolidated debt ratio defined above.

Note, the project debt, Project Adjusted EBITDA and cash interest expense for Piedmont are not included in the calculation of these ratios because the project is not included in the collateral package for the credit facilities.

Earnings and Cash Flow Diversification by Project

Non-GAAP Disclosures

Project Adjusted EBITDA is not a measure recognized under GAAP and does not have a standardized meaning prescribed by GAAP, and is therefore unlikely to be comparable to similar measures presented by other companies. Investors are cautioned that the Company may calculate this non-GAAP measure in a manner that is different from other companies. The most directly comparable GAAP measure is Project income (loss). Project Adjusted EBITDA is defined as project income (loss) plus interest, taxes, depreciation and amortization (including non-cash impairment charges) and changes in the fair value of derivative instruments. Management uses Project Adjusted EBITDA at the project level to provide comparative information about project performance and believes such information is helpful to investors. A reconciliation of Project Adjusted EBITDA to Project income (loss) and to Net income (loss) by segment and on a consolidated basis is provided on slides [32 and 33].

Cash Distributions from Projects is the amount of cash distributed by the projects to the Company out of available project cash flow after all project-level operating costs, interest payments, principal repayment, capital expenditures and working capital requirements. It is not a non-GAAP measure. Project Adjusted EBITDA, a non-GAAP measure, is the most comparable measure, but it is before debt service, capital expenditures and working capital requirements. The Company has provided a bridge of Project Adjusted EBITDA to Cash Distributions from Projects on slide 31.
